

Table of Contents

1. Introduction to the Database

2. GIS/Software structure

2.1. Application overview

- 2.1.1. Operations Concept
- 2.1.2. Application Category
- 2.1.3. Relational Structure
- 2.1.4. Layer Structure
- 2.1.5. Functions

2.2. Architecture

2.2.1. Directory Structure

2.2.2. Table types

2.2.3. Structural Tables

- 2.2.3.1. Seismogenic Sources - from Geologic/Geophysical Data
- 2.2.3.2. Seismogenic Sources - Historical - Well Constrained with Geological Background
- 2.2.3.3. Seismogenic Sources - Historical - Well Constrained, no Geological Background
- 2.2.3.4. Seismogenic Sources - Historical - Poorly Constrained with Geological Background
- 2.2.3.5. Seismogenic Sources - Historical - Poorly Constrained, no Geological Background
- 2.2.3.6. Seismogenic Sources - Deep
- 2.2.3.7. Integrated Source Dataset
- 2.2.3.8. Seismic Behaviour
- 2.2.3.9. Fault Scarps
- 2.2.3.10. Tectonic Lineaments
- 2.2.3.11. Summary of structural tables

2.2.4. Instrumental Tables

- 2.2.4.1. Assign Studies
- 2.2.4.2. Assign Questions
- 2.2.4.3. Assign Pictures
- 2.2.4.4. Assign References
 - 2.2.4.4.1. Assigning a new Code Reference
 - 2.2.4.4.2. Filling-in the Code Publication field
- 2.2.4.5. Summary of instrumental tables

2.2.5. Support Tables

- 2.2.5.1. Source Specific support tables
- 2.2.5.2. Source Generic support tables
 - 2.2.5.2.1. Seismological data: instrumental seismicity
 - 2.2.5.2.2. Seismological data: historical seismicity
 - 2.2.5.2.3. Previous Fault Compilations
 - 2.2.5.2.4. Additional Geophysical/Seismological Data
- 2.2.5.3. Generic support tables
 - 2.2.5.3.1. Geographic and elevation data
 - 2.2.5.3.2. Administrative data
- 2.2.5.4. Summary of support tables

3. Operating manual

3.1. Installing the Database

3.1.1. Generalities

3.1.2. Macintosh-users version

3.1.3. PC-users version

3.2. Using the Database cartographic interface

3.2.1. Generalities

3.2.2. The File menu

3.2.2.1. File > Page setup...

3.2.2.2. File > Print Current Table or Map

3.2.2.3. File > Save Active Window as Picture or Table

3.2.2.4. File > Close DISS

3.2.2.5. File > Exit MapInfo®

3.2.3. The View menu

3.2.3.1. View > Whole Italy

3.2.3.2. View > Digital Topography

3.2.3.3. View > Geographic grid

3.2.3.4. View > Drainage

3.2.3.5. View > Administrative boundaries

3.2.3.6. View > Cities

3.2.3.7. View > Instrumental Earthquakes

3.2.3.8. View > Historical Earthquakes

3.2.3.9. View > Felt Reports

3.2.3.10. View > Previous Fault Compilations...

3.2.3.11. View > Show Data About Current Fault Compilation

3.2.3.12. View > Additional Geophysical/Seismological Data...

3.2.3.13. View > Show Info About Additional Data

3.2.3.14. View > Seismogenic Sources

3.2.3.15. View > Tectonic Lineaments

3.2.4. The Tools menu

3.2.4.1. Tools > Select

3.2.4.2. Tools > Zoom In

3.2.4.3. Tools > Zoom Out

3.2.4.4. Tools > Zoom Info

3.2.4.5. Tools > Previous View

3.2.4.6. Tools > Grabber

3.2.4.7. Tools > Ruler

3.2.4.8. Tools > Object Info

3.2.4.9. Tools > Scale

3.2.4.10. Tools > Find

3.2.4.11. Tools > Coordinates

3.2.4.12. Tools > Show[Hide] Standard Button Pads

3.2.5. The Source Info menu

3.2.5.1. Source Info > Surface Expression and Geometry

3.2.5.2. Source Info > Seismic Behaviour

3.2.5.3. Source Info > Summaries of the Main Studies on the Source

3.2.5.4. Source Info > Comments and Open Questions

3.2.5.5. Source Info > Pictures

3.2.5.6. Source Info > References

3.2.6. The Lineaments Info menu

3.2.6.1. Lineament Info > Main Features

3.2.6.2. Lineament Info > References

3.2.7. The Scenarios menu

3.2.7.1. Scenarios > 40 km Map...

3.2.7.2. Scenarios > 150 km Map...

- 3.2.7.3. Scenarios > Worst-case Scenario...
- 3.2.7.4. Scenarios > Best-case Scenario...
- 3.2.7.5. Scenarios > Cities within 25 km...
- 3.2.7.6. Scenarios > Historical Earthquakes within 50 km...(CPTI)
- 3.2.7.7. Scenarios > Historical Earthquakes within 50 km...(CFTI)
- 3.2.7.8. Scenarios > Historical Earthquakes within 50 km...(NT)
- 3.2.7.9. Scenarios > Instrumental Earthquakes within 50 km...
- 3.2.7.10. Scenarios > Clear Scenarios

3.2.8. The Maintenance menu

- 3.2.8.1. Maintenance > Update Historical Earthquakes
- 3.2.8.2. Maintenance > Update Instrumental Earthquakes
- 3.2.8.3. Maintenance > Update Seismogenic Sources
- 3.2.8.4. Maintenance > Create Geographical Grids
- 3.2.8.5. Maintenance > Update Tectonic Lineaments

3.3. Consulting the Database

3.3.1. Generalities

3.3.2. Browsing sample records

- 3.3.2.1. Sources derived from geological/geophysical investigations
- 3.3.2.2. Sources derived from well constrained and from poorly constrained historical data with geological background
- 3.3.2.3. Sources derived exclusively from well constrained and from poorly constrained historical data
- 3.3.2.4. Source derived from historical data suspected to be deeper than usual

3.3.3. Making the seismogenic source records interact with the other data stored in the Database

- 3.3.3.1. Relationships among adjacent seismogenic sources
- 3.3.3.2. Relationships between a seismogenic source and the tectonic setting of its environs
- 3.3.3.3. Relationships between a seismogenic source and its associated earthquake
- 3.3.3.4. Relationships between a seismogenic source and other earthquakes in the surroundings

4. Updating the Database

4.1. Adding individual sources

4.1.1. Entering source parameters

- 4.1.1.1. Assigning a new identification code
- 4.1.1.2. Entering spatial and geometric parameters
- 4.1.1.3. Entering descriptive parameters
- 4.1.1.4. Entering surface ruptures

4.1.2. Adding explanatory texts for individual sources

- 4.1.2.1. Text content
- 4.1.2.2. Text format and other conventions
- 4.1.2.3. Naming and placing the text files in the Database
- 4.1.2.4. Updating the Assign Studies and Assign Questions tables

4.1.3. Adding pictures and captions for individual sources

- 4.1.3.1. Selecting pictures
- 4.1.3.2. Preparing a new picture
- 4.1.3.3. Creating captions
- 4.1.3.4. Giving a title to a picture
- 4.1.3.5. Updating the table Assign Pictures
- 4.1.3.6. Placing the picture and caption files in the Database

4.1.4. Adding references for individual sources

4.2. Adding Previous Fault Compilations

4.3. Adding Additional Geophysical/Seismological Data

4.4. Adding Tectonic Lineaments

4.5. Database maintenance

Appendix I

- a** - *Seismogenic Sources - from Geologic/Geophysical Data*
- b** - *Seismogenic Sources - Historical, Well Constrained*
- c** - *Seismogenic Sources - Historical, Poorly Constrained*
- d** - *Seismogenic Sources - Deep*

Appendix II

List of illustrations associated with individual sources

Appendix III

List of *Previous Fault Compilations*

Appendix IV

List of tables of *Additional Geophysical/Seismological Data*
